

**Michael Radu came out to the flying site on November 12 and proceeded to park behind the Porta potty's in the grass there. Not realizing how wet and muddy that area is. Anyway he ended up getting stuck up to his axles pretty much in mud. So today everybody was out here at a meeting and we proceeded to pull him out of the mud. The pictures are of his situation before pulling him out. Let everybody know not to drive anywhere on the flying site except in the parking lot.**
